Subject: Immunoperoxidase technologist

Dr. Donald M. Cook
Clinical Chief, Laboratory Medicine Program St. John's, NL, Canada A1C 5B8
Telephone: 709-777-5482
FAX: 709-777-5178
E-mail: donald.cook@hccsj.nl.ca

Dear Dr. Cook,

In responding to your request for updating one of your technologists for a four week period, I am willing to provide the training and the technical help in the immunoperoxidase staining for your Institution's needs.
According to my experience, a two week training period should suffice for:
two days of gross macroscopy / tissue processing overview, one day in histology laboratory and seven days in our immunopathology laboratory.
Should any additional time be needed, we would advise you at the end of the first week of internship.
We may be able to evaluate your technologist on most of the requirements enumerated in your letter dated October 18, 2005, with exception to #5:
external proficiency testing.
It our policy to pay a teaching premium to the technologists involved in clinical instruction and this sum is $150.00 per day, an invoice would be issued to your Institution.
At present we are already committed to two medical technology interns for a stage of three weeks therefore I could accommodate your employee on November 21, 2005.
Please let me know your decision on this matter.

Yours sincerely,

Edouard Depestre
Chief of Pathology Services
3755 CHEMIN DE LA CÔTE-STE-CATHERINE, MONTRÉAL (QUÉBEC) CANADA H3T1E2

Dear Dr. Cook,
Dear Mr. Dyer,
We certainly can receive your technologist in January, preferably starting January 16, 2006.
We will need a letter confirming the date of his arrival also confirming his assurance coverage during his stay in our laboratories.
Sincerely yours,
Edouard Depestre
