Considering both of your comments, I will probably need to make some changes to my draft letter (sent in prevoius e-mail). I am away from my laptop and any internet connection right now but I will be in touch.

Thanks Ken. That is understandable about treatment and very fair. I will keep in touch this pm.

Hi Donna

I'll wait to hear back from you on your chat with Pat before I send to Robert. I don't want to add a treatment statement as this was an informal opinion by Dr Laing. That advice is best passed on by her attending physicians. Tnx.

Ken

Hi,

I am also okay with the content with one correction. I am not sure [redacted] is in LTC but she does have dementia.

As a thought for your consideration, I wondered if we needed to make referenece to the fact (as we discussed yesterday) that there would be no change in management for [redacted].

I am trying to reach Pat to discuss whether Eastern is still okay with contacting [redacted] (as we had originally agreed they would some time ago) and also to inquire about whether family of [redacted] has been reached yet. I am heading over to hospital shortly but will keep trying Pat throughout the afternoon and will keep in touch.

I completed chart review on RP this am and have a little more information to add re dates of ER/PR testing.

Donna

Hi Ken,

This works for me as long as Eastern Health is aware and still agrees to contact the client. Donna, is this still okay and/or do you need to confirm this with Pat?

I have drafted a letter to respond to Mr. Thompson's April 1 memo and will send to you shortly for your review and confirmation that all is accurate.

 Subject: Draft E-mail to Robert Thompson re [REDACTED] and [REDACTED]

Hi Lisa and Donna

Here's a draft of the e-mail that I intend to send to Robert in follow up to his phone request to the CEO. Can you please review to ensure that we're all on the same page and let me know if you concur. As well, could you please confirm if you will be co-ordinating the reply to the 1 Apr 08 letter from Mr. Thompson. Tnx.

Dear Robert

Further to your March 31, 2008 phone request to the CEO regarding follow up and notification of the subject patients, I note the following:

1. [REDACTED] - following return of the Mount Sinai result, Dr. Paul Neil arranged further review with Dr. Bev Carter, who was in agreement with the Mount Sinai assessment, which indicated a small area of micro invasion. [REDACTED] original ER/PR was 20/40, and her Mount Sinai retest result was 20/10. Dr. Neil and I discussed the case further with Dr. Kara Laing on 1 Apr 08. Dr. Neil will be issuing an amended report to the attending surgeon (Dr. [REDACTED]), and recommend that he arrange follow up with the patient and as necessary, her oncologist. Additionally, Eastern Health will be asked to notify the patient directly, as they have been handling follow up on cases of this sort
  
2. [REDACTED] - her original ER/PR was 0/30 and her Mount Sinai retest indicated DCIS. Dr. Carter also reviewed this case and agreed with the Mount Sinai interpretation. Eastern Health will be contacting the family [REDACTED] is a LTC resident with dementia), as they have been handling follow up on DCIS cases.

I have not mentioned names here for privacy purposes. If clarification is required on the names just drop me an e-mail and I'll give you a call to confirm. Hope this suffices, and please let me know if further info is required.

---

Ken
