Hi there,

I was talking to Dr. Bev Carter on Thursday to clarify some ER/PR info. In the past with the Mt.Sinai rereads we were told by Dr. Dan Fontaine that anything positive was a positive and that is how we entered them. Dr. Carter says that I should clarify with you as to the oncologists decision as they are only saying "testing shows nuclear staining in tumor cells" to me that would be a positive but I wanted to be sure. If you could let me know so I can inform all registries staff.

Thanks,

Callista
