Hi Dr. Mullen,

We shall be starting to stain the next batches and will start bringing them to you as they become ready for reading. Also the rpt are ready for you let me know when you want me to bring them over.

Maria

This is the next set of results. I am waiting for the blocks which have been cut to be stained. I will read them as soon as they are available. The only other material I have to review are the previous negatives (0 or <1% with no internal control, an internal control that did not stain or stained weakly) which were repeated to ensure that we did not miss any positives. They should be available early next week.
