

# Memorandum

To: All Pathologists  
CC: Pathology Secretaries  
From: Paul Neil  
Date: 8/23/2005  
Re: ERPR and Her 2 neu

---

As per my conversations with Dr. Don Cook, Clinical Chief of Lab Medicine in St. John's, please be advised that they are **temporarily** discontinuing the ERPR immunohistochemisrty as of today and will be referring all cases to Toronto. (see attached). I have asked Maureen to type a similar template for our use. As per Dr. Cook's previous memo on Her-2-neu, this analysis should also be done on the same block. Please try to select blocks with included normal breast tissue for internal controls.

Thanks
