I have no idea of the dates when I talked with Pat on this issue. I may have some follow-up e-mails but I doubt it

Hi Don,

Debbie just called this morning and was wondering if you would have any note or recollection of dates that you contacted Pat inquiring about any information about the new patients. The reason why she is asking for it is because in her chronology there is a lag between the May 28th letter we sent to EH and a follow up email that we sent in July. I told her that you spoke to Pat on the phone a number of times and she was wondering if you knew the dates etc.

Thanks,

Reza

bert:

I have compiled a chronology of events related to "newly identified patients" [since March, 2008] added/to be added to the ER/PR Database. If anyone has anything to add to the table please forward the information to me and I will insert the additions.

I also compiled a chronology of events related to "newly identified patients" [since October 2007] when this became a concern of ours. I will forward it if you think it would be helpful setting the context for the management of newly identified patients.

You will note that I have started to address the questions put forward by Sandy Chaytor, but I would prefer confirmation from you/NLCHI that I have not omitted any relevant details (emails, telephone conversations, etc.).

Debbie
