Meeting Notes
July 14, 2005
Laboratory Medicine

Present: Ms. Heather Predham
Dr. Don Cook
Dr. Bob Williams
Mr. Terry Gulliver

Issue Discussed: ER/PR Receptor Results

Priorities:

1. Identify all people who had ER and PR receptors.
2. Ones who are negative for ER and PR receptors – recheck receptors with new methodology.
3. Meet with surgeons and oncologists.
4. Assess current testing standards - cross referencing with another laboratory.
5. Advise the public.
6. Assess the quality of the service at the laboratory level once we have information on the magnitude of the problem and relevant timeframes. This will involve external technical consultation.
