Hi Pat:

As you are aware from our presentation we had asked Mount Sinai for two specific dates: the date the sample was received at Mount Sinai and the date the results were sent back to Eastern. From the response below it seems the only way to track the date they were sent back would be through Dr. Cooke. Can you check with him to see if such documentation exists?

Hi Don,

In regards to the two line items:

Date sample received - you can use the "ordered" date as the approximate date the samples were received from you. At the time we were not tracking the date received only the order date.

Date results sent back to Hospital/Health authority - we were not tracking this information now we are. If this is required perhaps Dr. Cooke can help since all emailed results went to him.

Please let me know if there is anything else you require,

Maria

Hi Maria - again, thanks for providing the ER re-testing database. I am now hoping you might answer a question for me:

In our original request to Dr. Pritzker we asked for two specific date fields, namely

2. Date Sample Received at Mount Sinai
3. Date Results Sent Back to Hospital/Health Authority

In the file you sent back the only date included was "ordered" - is this the date the test was ordered from NL, or from your own LIS system? Is it not possible to obtain the dates as per our request?

Hi Don,

All information has been sent to you. The excel chart was emailed and I have called and given you the password. The letter from Dr. Pritzker has been faxed.

Please let me know if you require any other information,

Maria
