Hi,

How are you? When Kara and I went through the retros this afternoon, we noticed that [REDACTED] had two addendums. Addendum #1 was on specimen number [REDACTED] and showed her with an original ER/PR of 5/25 and Mount Sinai's of 0/0. This is the information that we discussed at the panel.

However Addendum #2 is on specimen number [REDACTED] and shows Mount Sinai results as being er 10-20 and PR 30.

Can you check on this? Her MCP# is [REDACTED]

Thanks

Heather
