Don and Reza

I need to know when you were first advised that the carbene specimens had indeed been sent for retesting. The Oct24 spreadsheet says they were sent to MS on Sept 27. Was this spreadsheet the first time we knew?

My reason for asking is that I am puzzled why EH is only now contemplating making phone calls to these people and did not do so at same time as samples sent to MS.

My question does not reflect upon you at all. I just want to know the chronology.

Thks

Robert
