*Answers to HP*

Hi,

Please read below. I have no idea how we could have missed this lady so completely.....unless she was a consult on request by her physician, but if so the physician should have told her....I'll keep you updated.

Meanwhile we have another lady who has died but converted, her husband is in Corner Brook and Sharon and Kara will be talking about how best to address that.

Nancy, Nash and Kara are meeting with another husband in the am...same scenario, she has died but her results came back as converting.

The results of the physician contact is not very good.....I'll do up some numbers etc as we get more results

Heather

Hi,

A lady [REDACTED] called Nancy on Monday asking if she had been retested. Apparently she had called in the fall asking if there was retesting and would she be involved. She was told yes and that someone would be in touch. She called in on Monday asking if there has been any word on her retesting as she hadn't heard anything. She was diagnosed with cancer in 1999. Her original ER/PR form May 1999 showed "faint positivity in less than 20% of cells". There is an addendum on her pathology report dated November 4, 2005 with Mount Sinai results of ER: 90%, PR 40%. ??

I have gone through every scrap of paper related to ER/PR that I have and I can not find her name anywhere. We certainly didn't panel her. Can we quickly review her via phone or something and then get the letter to her GP? Would that be appropriate? She was seeing Dr. Tang at the Cancer Clinic.

I'd appreciate your advice

Heather
