**Subject:** FW: FISH CONFIRMATION

This is the clerical contact in Newfoundland. We should set up a conference call with Anwar next week as this is getting out of hand. We will also need to speak to O'Malley before we proceed.

Dr. Brendan Mullen  
Department of Pathology and Laboratory Medicine

**Subject:** FISH CONFIRMATION

Dr. Mullen:

All of our breast cancer patients with invasive disease now need to be tested up front for Her-2-neu by immunohistochemistry and all cases scores as 2+ should then be sent for FISH confirmation. Can you do this at your lab or should we send these cases elsewhere?

We need FISH confirmation on a case we just got back from you on [REDACTED]

Any questions please call Dr. Anwar at (709) 466-5238 or me at (709) 466-5593.

Beverley Stone for Dr. Syed Anwar
