Subject: ER/PR Update

Hi Ken,

I have finished calling the list of negatives ER/PR provided by Heather Predham. There were 63 patients identified to call. I made those calls Friday & Monday, required approximately 4 hrs.

Here is a update of those calls:

1. There are 4 clients that were not on the original ER/PR call list:

Will require contact information for these.

2. There were 3 clients with incorrect contact information (as previously identified but still cannot find any new contact information on sheets I provided from last calls):

3. There were 10 of the 63 clients were deceased (this was known from previous calls made)

Here are 2 of 63 clients I have to recall in order to reach, excluding clients with no contact information (3) and not on original list (4).

Also, Heather advises the decision to panel all positives is still to be decided but she will keep us informed. A team (oncologist, pathologist, Heather ..) are looking at this over the next week or so. Following, she will inform us regarding that decision. Also, she will inform re. what "Clinical Care" that will be required from the attending physician. She says it will likely involve progress note, discharge summary, significant lab etc. In addition, Heather advises we they will be deciding on how to approach the issue for patients that have since deceased. Also, that for clients that have unavailable contact information, we will have to get creative on how to get a proper telephone contact. Note: I had previously called Next of Kin & Information for our clients with no contact information but unsuccessful in obtaining new telephone #s. e

Also, Heather advises we should be keeping documentation of calls made throughout this process- I have kept a spreadsheet of calls throughout this process.

Also, Ken I was unsure if the lists I had previously left with Helen Sparkes regarding clients that were not reached after multiple calls had been contacted by you. I reached 4 of the 14 of these during my calls regarding results, but was unsure regarding other 10.
