Thanks for this Heather. This is the sort of thing we need to be doing for all those lists. Pat

Subject: Other NLCHI list

Hi,

When NLCHI dropped off the list of "Missing Original ER Scores", they also included another list. I'm not sure what this one would be for but in case it is for communication, I just went through it to confirm communication:

Of the 53 patients listed:

- 3 are highlighted as being newly identified (currently up at Mount Sinai)
- 18 are identified as being deceased
- 12 were confirmed negative and told by us in February 2006
- 11 were paneled and letter sent in February and March 2006
- 1 was confirmed negative and told via SJNHB
- 3 are DCIS (1 from Western) the medical directors were discussing disclosure for these patients
- 1 was confirmed negative from Central
- 3 were confirmed negative from Western
- 1 is the lady that we were discussing this am that Pathology was reviewing

Like I said, I'm not sure what this list was given to me for, but that's it from a communication perspective.....

Heather
