Subject: RE: Report from tonight

Hi Susan,

I think you have captured our discussion from yesterday. Just a couple of suggestions/info

Paragraph 6 I would say internationally recognized Hospital Information System (HIS) of which there is a separate module Laboratory Information System (LIS)

PAGE 2 PAR 3 WE REVIEWED FROM JAN 1997 – AUGUST 1 2005

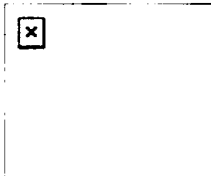

Page 2 par 8 – This reflects my comment and I would rather say " in hindsight and if time had permitted the laboratory at the HSC would of sent copies of all tests recorded in their Meditech system to the other regions so they could cross reference with the patient results in their Meditech system before sending to Mt Sinai for retesting.

Subject: Report from tonight

Hi, everyone:

I haven't even really proofed this yet for spelling, but I wanted to get it sent as they are shutting down email at 8pm tonight. Welcome your thoughts, suggestions, etc.!!
