

Spoke to Paul Neil July 14, 2006 9:30 AM

- Paul wishes to review any discrepancies in DCIS himself, with his pathologist and discuss themselves
- will review his 20 odd DCIS and compare with original pathology report to confirm as Confirmed DCIS.
- I asked him to send in his Pathology reports on confirmed DCIS so that I can sign them out with a confirmed text, if the wrong block was sent up, and mislabeled at MSH, and a ER to PR result comes back. Paul will send in the MSH report to me ~~and~~ and I will enter those results into our hospital information system and I will sign off.
- I spoke to Paul regarding deceased patients and that I am waiting for direction to sign them off.
