

Jan 10, 2007 - 4 in breast group

May 28, 2007 - only 2 left in group

approx May 17, 2007
 ? 3:00 PM - conversation with Dr Dalton Had liaison many years ago regarding issues with ERIPR, can't remember specifics or details but did ^{get} a response from someone technical, believes issue was absence of controls

May 23 or 24, 2007 - Conversation with Dr. Paul Nerb, Reason Not sending ERIPR's to St. John's concerning low #'s in our breast group. Concerned with increased workload this would cause with the group. Will continue sending to Mount Sinai

May 25, 2007
 4:00 PM - Conversation with Dr Bob Williams stated he sent a letter to Mr. Bruce Tilley (executive) asking for increased authority for Clinical Chief

May 24, 2007
 10:00 AM - Conversation with Dr. Bill Nagels. re: issue of Clarmelle discontinuing ERIPR for St John's. Nagels states Dr. Gasse Not happy with ERIPR as no controls were sent, states there is no letter or documentation to this effect. No one in St. John's notified
