Dr. Jenkins:

Re ~~communication~~ & *compiling of all documentation*

1. I've flagged the summary 1997-2005 from Dr. Neil, and also the individual yearly stats.

2. Re the summary report from Bonnie Walker re people contacted, this is not in the file. Bonnie notes she has this, and will bring with her.

3. FYI...I flagged a listing that was received from Heather Predham, and an email from Bonnie re calls made, in case you need them as a reference.

As well, I now have a file of info from Dennis Boone, Dr. Neil's office, and from the Lab stenos. (all on my desk). I also received a few things from Heidi and Susan. Bonnie is to provide her info today.

It's quite a lot of info, and I want to make sure this is done correctly. Will I just go ahead and start incorporating all with the documents that we have. In not being familiar with this type of info, I'm not sure if all of this needs to be included or not.

Hellen.

- Don wants copies of reports
- legislation has changed to allow sharing of patient info direct to Don
- send to Don by courier.
- will need path reports as well to back up documentation.
- what did "report" mean on Paul Neil's summary (did this mean tissue blocks couldn't be find).
- Bonnie will check ē path lab to get copies of path reports. Bonnie will check ē Sharon
