RE: ERPR Request of October 29, 2007

Dear Ms. Gillam,

In reference to the list on deceased patients that you have provided to me for recall, I have reviewed each as follows:

1. [REDACTED] SU-3325-03 Will be sent.
2. [REDACTED] SU-3454-02 Not sent due to fact that this was a skin biopsy with cancer invading lymphatics. Right breast biopsy SU 2689-01 showed ER+ 25%.
3. [REDACTED] SU-2953-04 Will be sent.
4. [REDACTED] SU-1848-03 Will be sent.
5. [REDACTED] SU-6114-03 Not sent due to fact that this was skin biopsy with metastatic carcinoma. Original ER was done on old method in 1992. SU-4935-92.
6. [REDACTED] SU-1775-03 Not sent since this was mass in right cheek. Preferred diagnosis was metastatic. ER done on old method in 1992. SU-4452-92.
7. [REDACTED] SU-1700-03 Not sent since this was tumor in bowel compatible with peritoneal carcinomatosis. ER done on SU-1412-95 (old method)
8. [REDACTED] SU-3045-01 Not sent due to fact this was a bone biopsy suspicious for metastatic malignancy. Features were suggestive but not diagnostic of a breast primary.

Sincerely,

Dr. Paul Neil, Director of Pathology and Laboratory Medicine

Dear Barry,

Please find enclosed the ERPR negative cases for three deceased patients to be processed by the ERPR protocol. I have included the appropriate slides, blocks and reports. I look forward to your reports.

Thanks,

Paul
