COPY

Ken,

We have a list of the DCIS cases on the spreadsheet from Mount Sinai (i.e. MS diagnosis). These are the cases we sent to them for retesting. Eastern Health has the original slides. We cannot review the original slides as they are still with Eastern. I have had conversations with Pat Pilgrim on this before. So has Jeanette. It was our understanding that they would be reviewed at Eastern Health. We can confirm that our paper diagnosis corresponds, however review of original slides cannot be done here.

Paul

There was a technical brief for the media this morning by Robert Thompson on ER/PR database issues. The CEO had a call today from the A/CEO at Eastern Health regarding the need for follow up on the DCIS cases.

Ken

Hi Hellen

Please get this note to Jeanette Grabka and Dr Neil on an urgent basis.

There is a need to confirm the diagnoses for all DCIS patients on our ER/PR list. Please develop a list of all the DCIS patients, pull the slides and reports, and confirm the diagnosis for each of the DCIS patients. If there are any doubts about the original diagnosis, please advise me regarding the need for any further testing.

Thanks.

Ken
