Subject: ER/PR data

Attachments: ER-PRCode.doc; CompleteER-PR.xls; RevisedER-PR.xls

ER-PRCode.doc (24 KB)

CompleteER-PR.xls (509 KB)

RevisedER-PR.xls (17 KB)

Attached please find the ER/PR results for the NL retrospective review. The initial report of the ER/PR results has been revised for 7 cases due to restaining of the material when the initial specimen was negative and the internal controls were either negative or absent. The cases are RS-█, RS-█, RS-█, RS-█, RS-█, RS-█ and RS-█.

When you have had an opportunity to review the results, I would like to discuss some of the technical difficulties we encountered with processing and staining the specimens. Some of the same issues are present in the current NL material.
