Sorry I missed your call today. I was at a biotech symposium outside the hospital. We will expedite the cases as much as our capacity permits. I have attached the results for two cases that I was missing the demographics for.

Dr.Mullen,

I have received the results the second batch and the note regarding the DCIS's and the block without the tumour. We will be sending up more cases next week. I would appreciate if these cases could be handled as quickly as possible as this story is breaking in the news and patients will be asking questions on their ER and PR status.

Regards,
Dr.Cook
