Subject: RE: retrospective study vs consultation

Hi Barry and Dr. Denic,

Dr. Denic I mentioned in my phone conversation that I would give you a timeline for the retrospective samples we have. We have a total of 96 cases of these we have stained as of Thursday 22 cases and Dr. Mullen is going to get started on reading these cases. These cases are the STAT cases you had sent me. This leaves a total of 74 cases which I am hoping we can do about 10 cases per week. Hopefully this will give you what you need in terms of timelines if not give me a call and I can see what else we can do on our end.

In regards to Barry's question the reason why you are not getting slides from the consults is that it is not our general process to send the stained consult slides back to the client we only send the blocks. In the case of the retrospective study we sent the slides and blocks back as this was a special case. I am therefore copying Dr. Pritzker on this email in order for him to O.K. this deviation from our consult protocol.

Hope this answers all your questions,

Maria

Hi Maria!

How are things?

We did not receive any of the ER/PR stained slides on patients performed at MSH on consultation requests but we did receive the ER/PR stained slides from the retrospective study. We have been asked by our lawyers to obtain these slides for review ,as well, we have patients requesting their original ER/PR stained slides and the ER/PR stained slides performed by MSH. We require the slides as soon as possible.

Let me know your position.

Please respond to Dr. Denic as well, both of us should be in the loop.

Thanx!!
Barry
