

Susan Bennett

Oct 3/05

- Not doing a press release
- $\approx 10\%$ of Breast Ca patients would be effected.
- when story broke on Friday was actually thought to mammography related.
- Dr Williams did NTV interview + is doing Telegram. - based on premise that retested one patient who was negative + became positive. This led to further testing
- Info: This has ~~to~~ ^{to be} individualized because of various treatment options based on no. of factors.

- media not interested in this story yet.

- Will post on website - ~~few~~ frequently asked questions along w patient liaison officer.

- 25% of patients who are negative will change + positive.

Lamy Galagher	- 62 -	} 150	-	ER IPR Neg
