It is not clear where Rolf left this, but I think it would be wise to do a chronology.

Subject: RE: NLCHI Database

Rolf,

What we are trying to determine is whether these are patients that the Commission has not previously been advised of. When was government and NLCHI advised by Eastern Health of the existence of these patients? How was government made aware? Is there written documentation regarding these patients between the government and any of the health authorities? If so, please produce as soon as possible.

Thanks,
Sandy

Reza advises that:

We were informed of the newly self-identified patients by Eastern Health and subsequently requested their info to be added in the database. We have not received this information so I would not know how many exactly they are and in what time frame. We will let you know as soon as we receive the information.

Rolf

Thanks, Rolf.

The reference to "newly self-identified patients" – how many patients are involved and what time frame is involved in terms of them having identified themselves? Also is there any information available as to why they were not originally identified?

Sandy

Sandy: Reza has advised the following:

"We have received some information from Eastern Health (e.g. new panel letters, new addresses) over last few weeks and the database has been updated based on that. We were hoping to receive more info on newly self-identified patients from Eastern Health, but have not received them as of today. Thus we will be giving a copy of the database to the commission tomorrow and as soon as we receive the new info an updated version of the database will be sent to the commission"
