Subject: Database for COI

Hi Debbie and Robert,

I am currently preparing the file for the COI with some new information on self-identified patients since March 2008. In our discussion yesterday we said that we would go ahead and release the database on Friday, August 14. I have noticed that there is still some information that is outstanding and we will need the original pathology reports from the regions to fill that in. Also, there is contact information on some patients that we haven't received yet.

Will we go ahead and release the database tomorrow and then again when we receive the reports?

Thanks,

Tracy Chislett

Hi Tracy:

The updated database should be released to the COI tomorrow. The database will now contain information on 1024 (1013 + 11 newly identified patients since March 2008).

The request for original pathology reports should come from NLCHI.

Thanks, Debbie
