Hi Diponkar,

As I mentioned to you in Ottawa, we will be receiving funding for the up grading of our Immunohistochemistry services. We will be planning a number of meetings with our key pathologists and technical people concerning the implementation of recommendations. I would appreciate your advice and guidance and I wonder if you can participate in some of these meetings in a conference call. I predict there will be a number of differing opinions on how to implement and when to decide on a start up date. I would certainly welcome an outside perspective in helping me achieve a consensus approach to full implementation.

Regards,
Don Cook
