**Subject:** ER PR Update

Hi,

I thought I would give you all an update before I brave the snow to go home!

St. John's Region

Confirmed Negative: 90  
Notified: 60  
Deceased: 4  
Difficulty contacting (either no answer or we don't have correct number): 22  
St. Pierre patients: 3  
There is one lady that requires further review before contacting

To be panelled: 93

25 on list for February 2

require review by the full panel.

This list has been sent over to Kara for review to see if there are any that don't

DCIS/NT:

24

Dr. Cook is pulling the pathology slides for review.

There are 97 people on my list that are not on the Mount Sinai list. I have to review the results we have obtained as consults to see if their results have already been reported via another route. I will keep you updated on this part.

**I do need direction on who I should contact in Clarendville and Carbonear to dicuss notification of the confimred negative and the panelling.....could you let me know the best person? How about the COO?**

Other Regions:

They have been sent the spreadsheets of the results returned from Mount Sinai.

I have sent the potential names that will be panelled to the Cancer Clinic to let me know who is a cancer clinic patient. Those who are will definately be panelled. I will let the regions know their names and if there are any others that they would like to have panelled they will have to provide some clinical infomration to us/

I think that's about it....

Page me for clarification!

Heather
