Cathi,  
Can you clarify one point. Based on the first 50 patient records, did the findings indicate that in 20 cases(40%) there were errors in interpretation and reporting and that in 4 cases(20%) , the errors could affect patient outcomes.

Also, can you include the date when the physician's privileges were suspended.

Do we know when Eastern plans to begin patient disclosure? As you know, this matter has been raised related to the ER/PR issue. Minister will likely want to know Eastern's plan in this regard when he reads this note.

John,

As requested, please find the attached briefing note regarding the QA issues regarding Radiology services in Burin.

I have told Oscar that MCP will cooperate in any way it can to help identify the patients that Dr. Kasirye provided services to.
