Subject: FW: ATIPP Request

I do not have a file on this. Obviously, I have been deleting the information as it has come in. So, there will be nothing forthcoming from me. Pat

Hi everyone,

Deanne Emberley will be coordinating this request right now. We are currently on day 9, so if you could forward your information to Deanne asap we would greatly appreciate it.

I know that Corporate Communications information is enroute.

In speaking with Dan Boone, we do have an additional exception; anything Dan was present for could be identified as being solicitor privileged.

Please let Deanne know asap, when you anticipate getting the information to her. When it is reviewed and the exempted information identified, she will let you all know the information that must be released.

If you have any questions, don't hesitate to call

Heather

Hi,

I forgot to say that your search would include documents from May 1st 2005 to March 10, 2006....

Sharon, would you be able to pass this on to the oncologists in your area?

Heather

Subject: ATIPP Request

Hello everyone,

CIHRT Exhibit P-3166 Page 2

I just received the ATIPP request from Mark Quinn at CBC for "all reports, memos, letters, briefing notes and e-mails at the Eastern Regional Health Authority between May 1, 2005 and the present - - regarding hormone receptor tests for people with breast cancer."

A couple of things:

1) I can't handle this request. Pam and I have chatted about this already; since I've been so involved we certainly don't want any perception of bias in completing the request. I'm not sure who will coordinate the request, we will have to determine that tomorrow, but we will let you know.

2) The clock has started to tick...we have 30 calendar days to complete the request....**that gives us until April 14 to have the request completed, including determining what can be excluded, speaking to legal counsel if need be and determining the cost.....**, what I need for all of you to do is start gathering all information that you have re: ER/PR. Anyone else in your area involved in this issue would also have to be notified and start gathering information. This includes doing a search on your computers and e-mails using the keywords "ER/PR" or "estrogen" etc. If you are unsure how to do this search, let me know.

We have to gather all the information together to review it and see what information must be excluded from release. The two biggest issues will of course be the personal information and information pertaining to a quality review, and therefore protected under the Evidence Act.

The person coordinating this release of information will get us all together in the very near future.

If you have any questions, let me know

Heather
