**Subject:** ER PR Support Needs

Hi Pam, As discussed, I am outlining the support that is still needed ....

- . DCIS verification to be complete
- . Notification by Doctor Review to be signed off and complete . Late identifiers to be completed and ensured entry in the database with designation of "why late"
- . Discussion and action with NLCHI re limitations and correct usage of the information in the databas . Need for hesather and yourself on the Working Group . Need to set up the "who" and the "how" of continuing follow up of patient requests and coordinating any information going to and coming from the lasb in terms of testing requests and results.
- . Need to designate a person to collaborate with the cancer care program to follow up on any issues involving retesting....person Sharon talks to...person who talks to any of the oncologists . Need to have ongoing access to Heather because of her knowledge and history with this.
- . Support to coordinate the tabletoip exercise . Person tocoordinate the final "sign off" of the database and confirm this with NLCHI and the other helth authorities This is my first go at this. Run it by Heather to see what she sees as work remaining. I have not included "telling the story" or "lessons learned"?? We know that many of us will be very involved in this.
