Subject: St. Pierre Results
Attachments: St. Pierre retesting results.pdf

Hi,

Please find attached a list of St. Pierre residents and their status regarding ER/PR retesting.

Sharon, you can also refer Dr. Bondonneau to the February 8, 2006 correspondence you translated for us that went to Dr. Pascal Malluret

There are more patients on Dr. Bondonneau's list than we had in our database. I went through each one's pathology and outlined why they were not included. Of course, if he needs more information, don't hesitate to contact me. Also, if it's not clear, call me

Thanks

Heather

Table 1

Patients identified in Communication from Dr. Michel Bondonneau
 Dated May 9, 2008

Name	MCP#	Comment
[REDACTED]	[REDACTED]	This lady was retested. Her original results were ER neg PR neg. Upon retesting, her ER was 80 and PR 30. This case was paneled and the letter is attached.
[REDACTED]	[REDACTED]	She was diagnosed in January 2005 with DCIS and as a result, no ER/PR testing was conducted.
[REDACTED]	[REDACTED]	She was diagnosed in May 1997. Her hormonal status at the time was ER 90, PR 90. She did not meet the criteria of retesting and therefore is not involved in this process
[REDACTED]	[REDACTED]	She was diagnosed in November 1999. Her hormonal status at the time was ER Positive, PR Negative. She did not meet the criteria of retesting and therefore is not involved in this process
[REDACTED]	[REDACTED]	She was diagnosed in November 2003. Her hormonal status at the time was ER 90%, PR 90%. She did not meet the criteria of retesting and therefore is not involved in this process
[REDACTED]	[REDACTED]	This lady was retested. Her original results were ER neg PR neg. Upon retesting, her results were unchanged as ER 0% and PR 0%.
[REDACTED]	[REDACTED]	This lady was retested. Her original results were ER neg PR neg. Upon retesting, her results were unchanged as ER 0% and PR 0%.
[REDACTED]	[REDACTED]	She was diagnosed in May 2003. Her hormonal status at the time was ER 90%, PR >90%. She did not meet the criteria of retesting and therefore is not involved in this process
[REDACTED]	[REDACTED]	She was diagnosed in February 2006. Eastern Health was not reporting ER/PR at that time; all hormonal receptor status testing and reporting was being done at Mount Sinai, therefore she is not involved in this process.
[REDACTED]	[REDACTED]	She was diagnosed in February 1999. Her hormonal status at the time was ER 70%, PR 45%. She did not meet the criteria of retesting and therefore is not involved in this process
[REDACTED]	[REDACTED]	I cannot locate any pathology results on this lady indicating a diagnosis of breast cancer. If you have further information, please contact me.
[REDACTED]	[REDACTED]	She was diagnosed in April 1997. Her hormonal status at the time was ER 60-70%, PR 80-90%. She did not meet the criteria of retesting and therefore is not involved in this process

Name	MCP#	Comment
[REDACTED]	[REDACTED]	<p>She was diagnosed in May 1996. Her hormonal receptor status was performed using biochemical assay, which was the method used prior to the introduction of immunohistochemical testing. Her status at the time was ER PR Negative.</p> <p>The immunohistochemical testing method is the subject of the ER/PR review and was introduced in 1997.</p> <p>She did not meet the criteria of retesting and therefore is not involved in this process</p>
[REDACTED]	[REDACTED]	<p>This lady was retested. Her original results from ER neg PR neg. Upon retesting, her results were unchanged as ER 0% and PR 0%.</p>
[REDACTED]	[REDACTED]	<p>This lady was retested. Her original results from ER neg PR neg. Upon retesting, her ER was 80 and PR 15.</p> <p>This case was paneled and the letter is attached.</p>
[REDACTED]	[REDACTED]	<p>She was diagnosed in June 2006. Eastern Health was not reporting ER/PR at that time; all hormonal receptor status testing and reporting was being done at Mount Sinai, therefore she is not involved in this process.</p>

Table 2

Patients identified by Eastern Health not included in Table 1

Name	MCP#	Comment
[REDACTED]	[REDACTED]	<p>This lady was retested. Her original results were ER neg PR neg. Upon retesting, her results were unchanged as ER 0% and PR 0%.</p>
[REDACTED]	[REDACTED]	<p>This lady was retested. Her original results were ER neg PR neg. However this lady was diagnosed with DCIS, Mount Sinai does not test DCIS for ER/PR and therefore she was not retested</p>
[REDACTED]	[REDACTED]	<p>This lady has passed away. She was originally ER neg PR neg. Upon retesting her results were ER 60% PR 15% These results have not been disclosed to her family</p>
[REDACTED]	[REDACTED]	<p>This lady has passed away. She was originally ER neg PR neg. Upon retesting her results were ER 0 PR 0 These results have not been disclosed to her family</p>
