Subject: Re: Topics for presentation

Not sure what tab 1 and tab 10 mean. I think we need an overview of the cancer diagnosis and treatment process generally, then an overview of ER/PR testing (what is it, what it means, how results are interpreted), and then some direct exposure to the lab environment and the steps involved in ER/PR, plus an overview of QA/QC related to ER/PR.

Hi Robert,

Pat Pilgrim's secretary asked that we provide her with a list of topics for the upcoming presentation (date and time have not yet been confirmed).

I have reviewed the presentations listed below. I think a combination of the two would be a good starting point for us.

ER/PR Binder Tab 1
Presentation to Cabinet
Estrogen and Progesterone Testing

ER/PR Binder Tab 10
Estrogen and Progesterone Testing
Members of the House of Assembly Briefing May 22, 2007
George Tilley, Dr. Oscar Howell, Dr. Nash Denic and Dr. Kara Laing

Your thoughts?

Debbie
