Great idea. I will ask Louise Jones who she would like to attend. I will include our team, but I may also include the Commission. Please arrange a date and time with Betty and we will make the invitations.

Robert Thompson
Deputy Minister
Department of Health and Community Services
Government of Newfoundland and Labrador

Robert:

Would you be interested in the Centre presenting preliminary results from our work on the ER/PR database. A possible date could be Monday August 27th, by which time we should have finalized the patient list and had 7 days work completed on the communications piece. Given we were not aware of the "Cleveland" patients it might also benefit us if representatives from Eastern Health were present. If there are any new developments coming from this meeting we would still have 10 days to adjust and meet our September 7th delivery date.
