Hi Maria -- mystery solved. The patient got married and that's why she had two last names. Sorry for bothering you with this.

Hi Don,

I apologize for not getting back to you last week. I have checked out system and what I am finding is not consistent with the name you have below. For case number SP-05-19151 the patient name is [REDACTED] DOB [REDACTED]. I also checked the excel spreadsheet that I sent you and the only names I saw were [REDACTED] RS [REDACTED] (SS2120) and [REDACTED] RS [REDACTED] (S279-03). Don I am not sure if this information helps. If you need my help call me on the mobile [REDACTED]

Maria

Hi Maria - have you been able to find out anything concerning a pathology report/retest for [REDACTED]?

12/8/2007

Hi Don,

I will check our records.

Maria

Subject: NL ER/PR Re-tests

Hi Maria:

We have found a patient with breast cancer who apparently was re-tested at Mount Sinai (SP- [REDACTED]). It has been entered into our Meditech system, which is our hospital information system. We have been unable to find the hard copy of the Mount Sinai pathology report/consult for this particular patient. I wonder if you could check this patient in your LIS system and let me know whether she had an ER/PR test done at Mount Sinai, and if so could you provide me with a copy of the report.

Thanks.
