

July 24/2005 EAPR Receipt

- Ms S. Tullis ✓
- Dr P. Gubler ✓
- Dr K. Jones ✓
- Dr D. Corbin ✓
- Mr T. Gillman ✓
- Ms Susan Bonelty ✓
- Dr. Alan Kwon ✓
- Ms Barbara Kuller ✓
- Ms Deborah Kwon ✓
- Mr Dr. Boone ✓

- update w current status and what to know for other centres

- tests plus for 2002

16/25

25/32

22 or 23 to one

- there may be a problem with methodology as with the lab

- Dr. Jones w/ worried about weak positives

- Dr. Jones ~~is~~ wants to be sure new system is accurate and not overly sensitive
- only will get some of quality controls

- \* should we not test the reports against the Vestance systems

- Dr. Jones had distributed to capture different kinds of ~~cases~~ breast cancers with EAPR results

○ need to wait until we know that  
the results are valid

○ analysis on any day = ER/PR

\* PAM reports is in  
use

↓  
D. Kovi - we need more info.  
to get happen at the end  
at a high priority due to  
technological change

○ ↓  
duplicate patient concerns help  
report

↓  
get database of patients  
our study

○ need to check new Veterans System out

○ file out some of our concerns  
at end to make sure to capture our results

○ need more reports - systematic reports

○

Mr. Dan Boone  
[Dr. Bob Williams]**

- Update on current status and what we know from other centres.
- Testing patients for 2002. 16/24; 25/32; 22 or 23 to come.
- There may be a problem with methodology or with the lab.
- Dr. Laing not worried about weekly positives.
- Dr. Laing wants to be sure new system is accurate and not overly sensitive.
- Working with Mount Sinai on quality control.
- Should we not test the repeats against the Ventana System.
- Dr. Laing need database to capture different kinds of breast cancers with ER/PR results.
- Need to wait until we know that our results are valid.
- Controls are run every day on ER/PR.
- Pathologist reporting is an issue.
- Dr. Kwan will need more info. He feels happier at this meeting that a large percentage due to technological change. Duplicate positive conversions before we report. Get data base of patients re: our testing.
- Need to check new Ventana System out.
- Take out some of our conversions and send to Montreal General to confirm our results.
- Need more information – systematic information.
