August 5/05

Dughy Abbott

Graham Abbott, Manning, Stephanie Bower

Tilley, Williams

1. internal meetings
2. record - European Information  
- other centres in country
3. labs not reporting consistently  
- ie. What is being reported (10%, 0% →)

- results not reproducible - impacted by instrument
- 60% of labs can't pick up < 10%
- errors likely to be in lower expressing

Winnipeg

- ~~not~~ ~~area~~ vulnerable areas
  - pregnancy blocks
  - boiling
  - low gold on the antibodies

- tests are not reproducible \*
- our rates - 62-83 - average 75% \*

Mount Sinai - gold standard lab →

Pan Canadian network

2

Aug 5/18

- ① Mental Status - agreed to all go forward
  - do all - res.
  - 3-4 sub

} expert  
conclusion

② Extended Clinic

- ↳ Be - physical
- ↳ Mt-Status - shifted

③ Victoria reg.

- All relevant in reg
- protocols - same as elsewhere
- Two tests now - one validated,
- on maintenance - primitive - could be shared
- looking giving good results
- stuff - change
- benefits of new system
  - regularity
  - consistency
  - remove some of redundant areas
